

# PMS Power +

With the **PMS Power +** film from Sirius, we offer a very tear and puncture-resistant film that holds goods effective on the pallet and protects them from damage during transport. Thanks to the strong restoring force and the resulting high holding force, our PMS Power+ film is highly efficient. It reduces film consumption up to 50% and thus minimizes packaging costs without compromising on cargo security. This type is designed for stretch wrappers with pre-stretch > 200%. Whether homogeneous or inhomogeneous pallets, our PMS Power+ film copes with all challenges.

**PMS Power+ is available in thicknesses 15, 17, 20 and 23µ in 500 mm width.**

## PMS Power +: High performance coex stretch film

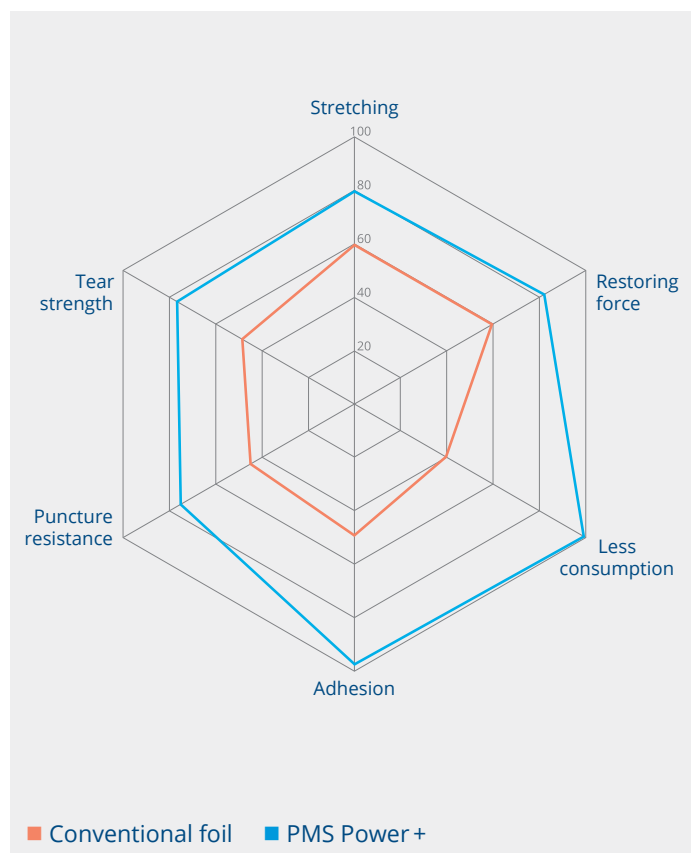

## Advantages

### Innovative / Sustainable

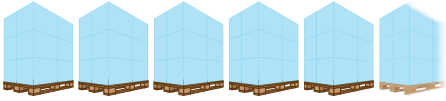

- Innovative, self-developed stretch film
- More running meter per roll after stretching (up to 300 %)
- Much more wrapped pallets per roll = less roll change = less cardboard cores = less truck shipments
- Enormous material savings up to 50 % = enormous CO<sub>2</sub>-reduction compared to conventional stretch films
- Suitable for use in the food industry and frozen food (direct food contact)
- 100% polyethylene recyclable
- **PMS Power +** – your contribution to environmental protection

### Efficient

- Enormous puncture resistance
- High restoring force = high holding force
- Outstanding load securing
- Reduced costs per pallet due to reduced foil consumption
- Smooth and quiet processing

## PMS Power + in comparison

Foil	Grams per pallet	Number of wrapped pallets per 1kg stretch film
20μ Power	453	 <b>2,21 pallets</b>
<b>15μ PMS Power +</b>	170	 <b>5,88 pallets</b>

16 windings • Stretch winder – Goldpack • Pallet size 1350x1400x2600mm
